

Figure 1. Measurement of the Sacral Clavicular Angle (SCA).

Table 1. Frequency distribution of traditional and short, apical, single or multiple fixation patients by demographic characteristics.

Demographics	Method				P-value	
	Multiple fixation		Traditional fixation			
	n	%	n	%		
sex	Female	44	95.7%	40	87.0%	.267
	Male	2	4.3%	6	13.0%	
race	White	41	89.1%	42	93.5%	.359
	Mixed	3	6.5%	3	6.5%	
	Black	2	4.3%	1	0%	
Total	46	100%	46	100%		

The probabilities of significance (p-value) refer to the chi-square test.
